

Objective: The primary objective of this course is to provide students with hands-on exercises of the different features of CADDDoctor For Autodesk Simulation.

Level:
Essentials

Duration: 1/2
day (4 hrs.)

Who Should Attend: This course is designed for any CADDDoctor For Autodesk Simulation user.

Pre-requisites: This course assumes knowledge of Autodesk Moldflow Insight, and Autodesk Moldflow Adviser mostly as it relates to the general user interface usage and model preparation.

CADDDoctor For Autodesk® Simulation

Autodesk® Official Training

Course Description

In this course, students learn the benefits and procedures of using CADDDoctor for preparing models for analysis. CADDDoctor is used for preparing models for both Autodesk Moldflow Adviser and Autodesk Moldflow Insight. The exercises relate to using both simulation packages.

Course Outline – CADDDoctor For Autodesk Simulation

- **Introduction to CADDDoctor:** Learn how to navigate and use the Interface
- **Exercises include:**
 - Evaluating model quality in Autodesk Moldflow Adviser
 - Fixing CAD models for use in Autodesk Moldflow Adviser
 - Evaluating model quality in Autodesk Moldflow Insight
 - Fixing CAD models for use in Autodesk Moldflow Insight
